

# Suggested Literature for Integration into Math Classes

Lynda Longpre / September, 2001  
Northern Lights School Division

*The author, title, grade level, publisher, year of publication and ISBN number (library ISBN number usually) are provided for each recommended book title. Some titles may be out of print but copies of the book may still be in school libraries so these titles are still included. The grade level stated in parentheses is one that is suggested in Children's Books in Print. These are simply guidelines as students of different ages can still enjoy and use books other than the suggested guideline levels. Books are classified according to the elementary math strands in the curriculum guide but many books could be integrated into other strands. Suggested titles have been recommended for use at the elementary and the middle years levels.*
